*The composite score is a summary score of all areas tested.

Note: Early fall testing measures what students learned the previous school year and retained over the summer. Test results help teachers focus on subject areas needing improvement.

Interpreting these scores:

As compared to all schools in the norm group, at each corresponding grade level, Holy Family Catholic School scored as well as or better than (the stated percentile) of the schools with that grade level.

For example, the fourth grade social studies score would be interpreted as “Holy Family’s fourth grade scored as well as or better than 89% of the schools with fourth grades in the norm group.”
